

Cancellous Screw Washer 510(k)Summary - Safety and Effectiveness K963420

NOV 15 1996

The proposed device, the Cancellous Screw Washer claims substantial equivalence to a currently marketed device, Synthes Screw Washer. The Synthes Screw Washer and the proposed device are available in either Titanium or Stainless Steel. Both function as added support under bone screw head and have no significant design differences. The Cancellous Screw Washers are washers designed for use in conjunction with cancellous bone screws. These implants are intended for fracture fixation of the metatarsals, metacarpals, and tarsal bones.
